EDUCATION

Ataturk University

Management Information Systems
2018 - 2022

Ataturk University

Computer Programming
2022 - Still

SMARTPRO ACADEMY

Web Programming
2022 - 2023

SKILLS

- ReactJS
- NextJS
- JavaScript
- TypeScript
- Redux
- Css (Tailwind, Sass)
- Rest Api
- Directus API

LANGUAGES

- English *B2*
- Turkish *Native*

HOBBIES

- Drawing
- Football
- Movies

CERTIFICATES

- [SQL Certificate](#)
- [Problem Solving](#)

EXPERIENCE

FRONT END DEVELOPER

BALANCE NETWORK - (March 2023 -)

- As a Web Application Developer at Balance Network, I played a pivotal role in the development of an exchange application and other projects. My primary responsibility was web application development, with proficiency in Typescript, React.js, Next.js, Node.js, and Web3 technologies.

Key Contributions:

- Collaborated within a team to create a cutting-edge cryptocurrency exchange platform, harnessing Web3 technology.
- Contributed significantly to the development of the Exchange application, encompassing wallet functionality, crypto trading, and transaction capabilities.
- Integrated various APIs for real-time market data, empowering users to make well-informed trading decisions.
- Actively participated in design, development, architectural decisions, and feature planning, working closely with UI/UX designers to enhance user engagement and create visually appealing interfaces.
- Demonstrated a commitment to staying current with the latest advancements in Web3 technologies through independent research, participation in online communities, and engagement in industry events.

PROJECT

EXCHANGE AND SIDE PROJECTS

- Played a key role in the development of the Exchange application, which encompasses features such as wallet functionality, crypto trading, and other related transactions, utilizing React.js, Next.js, and TypeScript.
- Integrated multiple APIs, including web sockets, for real-time market data, facilitating informed trading decisions for users.
- Conducted rigorous testing and debugging to ensure the application's stability, security, and responsiveness.
